ODOUR PURIFIER WITH CLEANING ACTION

Description

Nu-Compact Kleen™ is a biotechnology-based foaming cleaner designed to stop unpleasant odours at the source. It breaks down the organic material that is responsible for creating foul odours. Use it to deep-clean and eliminate odours in the dirtiest, hardest-to-clean places.

Applications

Nu-Compact Kleen™ is recommended for use in places that accumulate rubbish and odours, such as waste storage rooms, public stairwells, public car parks, used oil collection containers and any other problematic area. **Nu-Compact Kleen™** is also recommended for cleaning pet shops, aviaries, kennels, cowsheds, stables and other areas soiled by animals. **FOR PROFESSIONAL USE.**

Directions

Nu-Compact Kleen™ is a concentrated cleaner. Dilute it in cold water in the reservoir of a foam spray gun. Spray the foamy product on the surfaces to be cleaned, then squeegee or rinse. For optimal results, do not rinse.

Cleaning waste storage rooms: ① Using a broom or a squeegee, remove any excess rubbish from the floor. ② Adjust the foam gun to a 1:100 dilution. ③ Spray the product liberally on the floors, baseboards and any other surfaces exposed to contact with the waste. **Caution:** always be aware of any risks of electrocution, falls or other dangers. ④ Squeegee the excess cleaning solution towards the floor drains. ⑤ Only if necessary, rinse all surfaces with water.

Cleaning public spaces (stairwells, public car parks, etc.): Follow the same procedure as for cleaning waste storage rooms. If you cannot use a foam gun, use the following method: ① Dilute at 1:100 in a bucket. ② Apply cleaning solution liberally. ③ Using a push broom, scrub the soiled surfaces that are generating foul odours. ④ Squeegee the excess cleaning solution towards the floor drains. ⑤ Let stand.

Cleaning floors and surfaces in the pet or animal husbandry industries: To learn more about using **Nu-Compact Kleen™** as part of a complete sanitation program, contact your Innu-Science sales manager.

Cleaning tips

Clearly identify and mark off the work area as "slippery when wet" ■ Always clean from the cleanest to the dirtiest area and from the top to the bottom ■ Always work with clean, well-maintained tools ■ Follow suggested dilutions ■ Never mix products.

| Dilution table | |
|---|---------|
|  | 1:100 |
| | 1% |
| | 10ml/1L |
| | 50ml/5L |

Respect for the environment

Tips for being greener

Follow suggested procedures and dilutions ■ Stop refrigerating waste storage areas smelling foul by using **Nu-Compact Kleen™** ■ Never use chlorinated cleaners or products (bleach) ■ Avoid using disinfectants: adopt the principle of Rational Disinfection (for more information on this subject, ask your Innu-Science sales manager) ■ Train staff on the environmental impact of their work.

Environmental benefits

Reduced environmental stress ■ Low aquatic toxicity and readily biodegradable (according to OECD 301 series tests) ■ Reduced chemical waste ■ Concentrated product: reduced transportation (GHG) and packaging ■ No VOCs: reduced GHGs ■ Elimination of VOC-generating automatic fragrance dispensing systems and reduction of sick building syndrome ■ Reduced energy use since there is no need to refrigerate waste storage rooms ■ Reduced energy use due to effective cleaning without hot water.

Fits perfectly into any organisation's efforts to be more eco-responsible by going green.

Technology

Nu-Compact Kleen™ technology is based on combining readily biodegradable surfactants with active bacterial cultures. The precise combination of ingredients gets powerful cleaning results without the need for harmful chemical products. And the bacterial cultures provide deep cleaning in the hardest-to-reach places, while effectively eliminating foul odours.

Composition

5-15% non-ionic surfactants, <5% amphoteric surfactants, dye, fragrance, bacterial cultures, preservative.

Properties

Red liquid, camphor scent.

Regulatory compliance

Regulation (EC) No 648/2004 on Detergents

Regulation (EC) No 344/2005 on Ecolabel Criteria

Directive 1999/45/EC and Amendments on Dangerous Preparations

Regulation (EC) No 1907/2006, Annex II on Safety Data Sheets

REACH Regulation (EC) No 1907/2006

Irritating to the eyes.

Not regulated by the regulation on transport of dangerous goods.

Xi R36

Material safety data sheet available upon request. Read it before using this product.

Safety advice: S25 - Avoid contact with eyes. **S26** - In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
